WORK EXPERIENCE

Software Engineer

TATA Consultancy Services

06/2019 - Present

Major Contributions:

- Worked as a key role member in developing and enhancing the ticketing tool/application used in the BFSI(Banking, Financial Services and Insurance) platform.
- Collaboratively developed a concept in which we can store most of the HTML forms used across the application, in a database, from where it can be accessed dynamically, using JavaScript.
- Have 2+ years experience in front end development.
- Developed various screens used throughout the application, using AngularJS framework.
- Knowledge of workflow engine platform like Camunda for creating BPMN workflows.
- Developed heavy queries and implemented functionality to generate on-demand and weekly reports on various requirements.
- Developed UI for generation of reports, so that the user can generate report as per his/her need, and integrated with the reporting tool SSRS(SQL Server Reporting Services) .
- Developed microservices in spring used across application.
